

# Do you know what Shit Flow Diagrams are?

A Shit Flow Diagram (SFD) is an easy to understand advocacy and decision-support tool that summarizes and presents what happens to excreta in urban areas in a concise report.

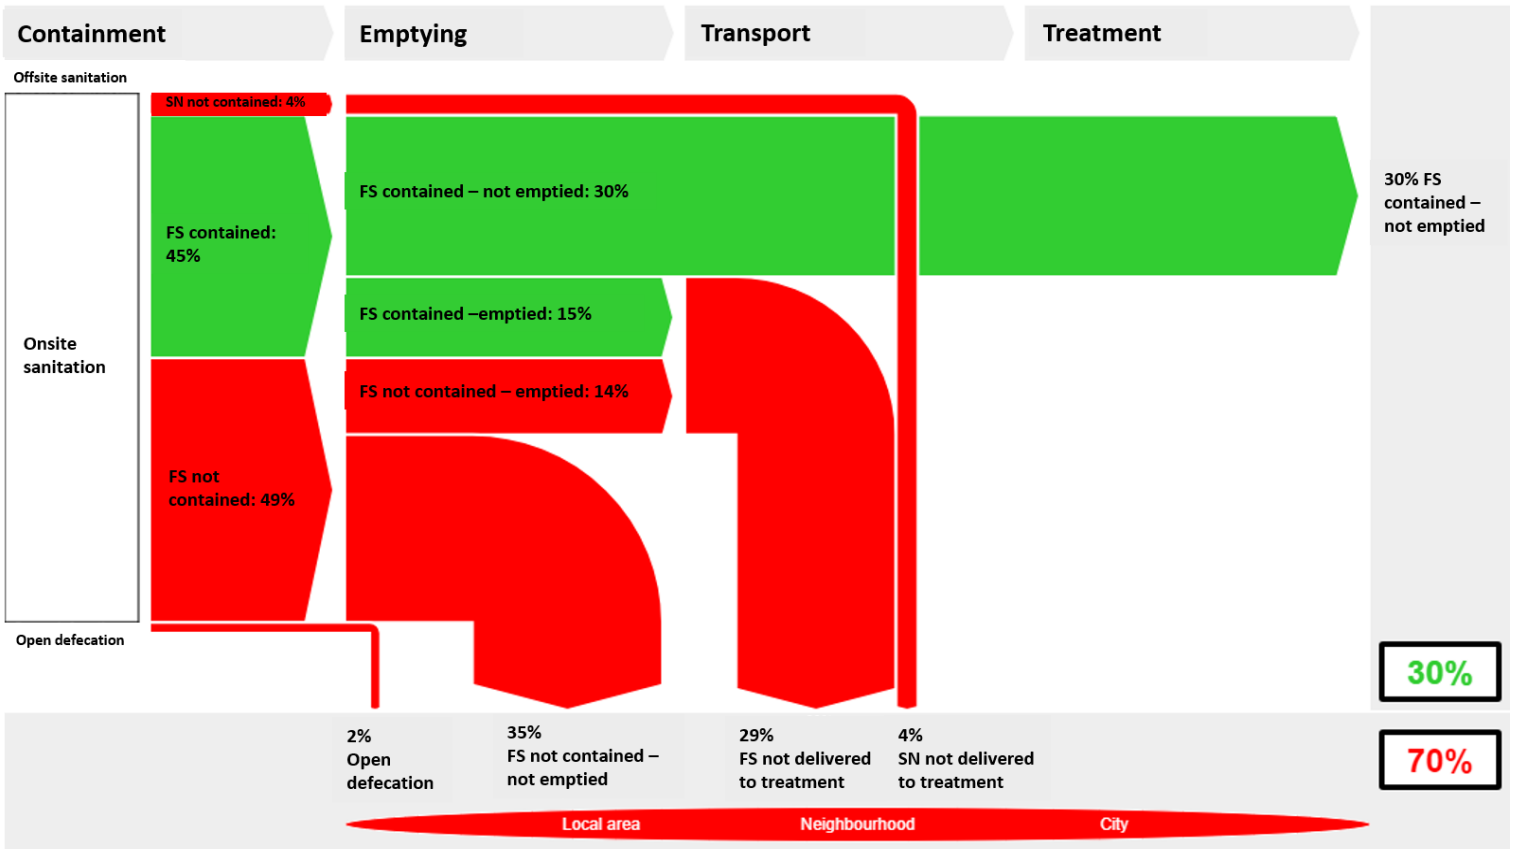

An SFD goes beyond this virtual representation to also include an assessment of the delivery of sanitation service in the town or city and the record of data sources.

At the World Water Week, you will have the chance to learn from our experience.

Visit us at the SuSanA booth at the exhibition centre (n. 44).

Tikapur, Kailali, Nepal  
Version: Reviewed  
SFD Level: 2 – Intermediate SFD

Date prepared: 11 Jan 2018  
Prepared by:  
Eawag/Sandec

Produced with support from the SFD Promotion Initiative with funding from the Bill & Melinda Gates Foundation. The SFD Promotion Initiative recommends that this graphic is read in conjunction with the city's SFD Report which is available at: [sfd.susana.org](http://sfd.susana.org)
